

DATASHEET

Anti-Serotype 8b Fowl Adenovirus (FAdV-8b) Fiber Protein Mouse Monoclonal Antibody (5F10)

CAT. NO. AXA0029

KEY FEATURES

Target	Serotype 8b Fowl Adenovirus (FAdV-8b) Fiber Protein	Source / Host	Mouse
Reactivity	FAdV-7 Fiber, FAdV-8b Fiber	Clonality	Monoclonal
Applications	IFA, WB	Storage	-20.0°C

BACKGROUND

Serotype 8b Fowl Adenovirus (FAdV-8b) Fiber Protein is a key structural protein of FAdV-8b, a member of the Aviadenovirus genus. It is a protruding fiber-like structure on the viral capsid, playing a crucial role in viral host cell recognition and entry by binding to specific receptors on the surface of host cells. This protein exhibits distinct immunogenic properties, capable of inducing the host to produce specific antibodies, and serves as an important target for the development of FAdV-8b detection methods and subunit vaccines. Its amino acid sequence and functional domains have characteristics that distinguish it from other FAdV serotypes, which are closely related to its host tropism and pathogenicity.

APPLICATION

To ensure optimal assay performance, AREX recommends conducting reagent titration tailored to each testing system for optimal detection results.

Application	Dilution Ratio
IFA	1:500-1:1000
WB	1:2000-1:5000

*Results are sample-specific. Please refer to your local assay conditions and test parameters for reference.

OVERVIEW

Description	Mouse Monoclonal antibody to Serotype 8b Fowl Adenovirus (FAdV-8b) Fiber Protein
Antibody Type	Primary antibody
Isotype	IgG
Immunogen	Prokaryotic expression product GST-Fiber of FAdV-8b Fiber gene
Form/Buffer	PBS, 20% Glycerol; preservative: 0.05% Sodium Azide
Alternative Names	FAdV-8b Fiber, Fowl adenovirus 8b fiber protein, FAdV serotype 8b fiber

*AREX continuously optimizes our products. Webpage content may not reflect the latest updates. For inquiries, please contact info@arexbio.com or your local distributor.

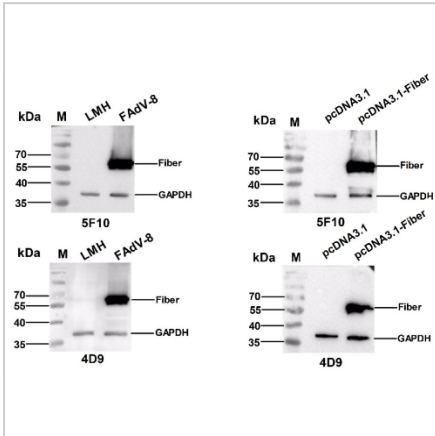

*Clone Number, Reactivity, Source/Host and Clonality can be found in the product name and Key Features section above.

DATASHEET

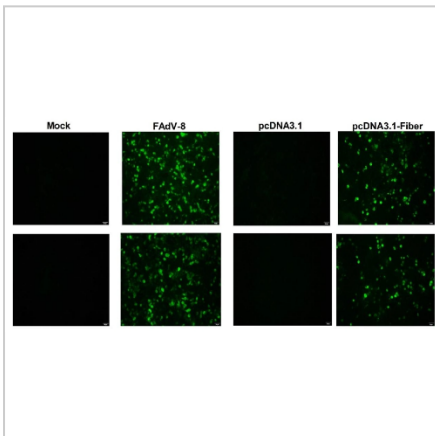

Anti-Serotype 8b Fowl Adenovirus (FAdV-8b) Fiber Protein Mouse Monoclonal Antibody (5F10)

CAT. NO. AXA0029

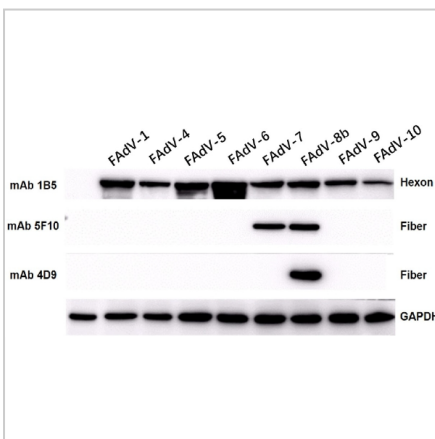

DATA

The WB results showed that the monoclonal antibodies 4D9 and 5F10 can effectively react with LMH cells overexpressing FAdV-8b Fiber and LMH cells infected with FAdV-8b.

The IFA results showed that the monoclonal antibodies 4D9 and 5F10 can effectively react with LMH cells overexpressing FAdV-8b Fiber and LMH cells infected with FAdV-8b.

Specific detection using WB showed that the monoclonal antibody 5F10 can effectively recognize the Fiber proteins of FAdV-7 and FAdV-8b.

STORAGE

Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles.

NOTE

For Research Use Only. Not for diagnostic, therapeutics, prophylactic or in vivo use.
