BACKGROUND

Component of the small ribosomal subunit . The ribosome is a large ribonucleoprotein complex responsible for the synthesis of proteins in the cell . Required for pre-rRNA processing and maturation of 40S ribosomal subunits . Part of the small subunit (SSU) processome, first precursor of the small eukaryotic ribosomal subunit. During the assembly of the SSU processome in the nucleolus, many ribosome biogenesis factors, an RNA chaperone and ribosomal proteins associate with the nascent pre-rRNA and work in concert to generate RNA folding, modifications, rearrangements and cleavage as well as targeted degradation of pre-ribosomal RNA by the RNA exosome .

APPLICATION

To ensure optimal assay performance, AREX recommends conducting reagent titration tailored to each testing system for optimal detection results.

DATASHEET

RPS19 Rabbit Polyclonal Antibody

DATA

Western blot analysis of RPS19 expression in HEK293T (A), K562 (B), SHSY5Y (C), mouse liver (D), mouse testis (E), rat liver (F), rat testis (G) whole cell lysates. (Predicted band size: 16 kD; Observed band size: 16 kD)

Immunohistochemical analysis of RPS19 staining in human colon cancer formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

STORAGE

Store at 4°C short term. For long term storage, store at -20°C, avoiding freeze/thaw cycles.
