BACKGROUND

Thiol protease . Has dipeptidylpeptidase activity . Active against a broad range of dipeptide substrates composed of both polar and hydrophobic amino acids . Proline cannot occupy the P1 position and arginine cannot occupy the P2 position of the substrate . Can act as both an exopeptidase and endopeptidase . Activates serine proteases such as elastase, cathepsin G and granzymes A and B .

APPLICATION

To ensure optimal assay performance, AREX recommends conducting reagent titration tailored to each testing system for optimal detection results.
