**BACKGROUND**

Scaffold protein involved in different aspects of polarized cell differentiation regulating epithelial and neuronal morphogenesis and T-cell polarization . Via its interaction with CRTAM, required for the late phase polarization of a subset of CD4+ T-cells, which in turn regulates TCR-mediated proliferation and IFNG and IL22 production . Plays a role in cell directional movement, cell orientation, cell sheet organization and Golgi complex polarization at the cell migration front . Promotes epithelial cell layer barrier function via maintaining cell-cell adhesion . Most probably functions in the establishment of apico-basal cell polarity .

**APPLICATION**

To ensure optimal assay performance, AREX recommends conducting reagent titration tailored to each testing system for optimal detection results.

**Scribble Rabbit Polyclonal Antibody**

CAT. NO. APA11183

**DATA**

Western blot analysis of Scribble expression in HEK293T (A), MCF7 (B), HCT116 (C) whole cell lysates. (Predicted band size: 174 kD; Observed band size: 240 kD)

Immunofluorescent analysis of Scribble staining in MCF7 cells. Formalin-fixed cells were permeabilized with 0.1% Triton X-100 in TBS for 5-10 minutes and blocked with 3% BSA-PBS for 30 minutes at room temperature. Cells were probed with the primary antibody in 3% BSA-PBS and incubated overnight at 4 °C in a humidified chamber. Cells were washed with PBST and incubated with a AREX® Fluor 488 -conjugated secondary antibody (green) in PBS at room temperature in the dark. Phalloidin - AREX® Fluor 594 was used to stain Actin filaments (red). DAPI was used to stain the cell nuclei (blue).

**STORAGE**

Store at 4°C short term. For long term storage, store at -20°C, avoiding freeze/thaw cycles.
