BACKGROUND

Cadherins are calcium-dependent cell adhesion proteins . They preferentially interact with themselves in a homophilic manner in connecting cells; cadherins may thus contribute to the sorting of heterogeneous cell types. CDH1 is involved in mechanisms regulating cell-cell adhesions, mobility and proliferation of epithelial cells . Promotes organization of radial actin fiber structure and cellular response to contractile forces, via its interaction with AMOTL2 which facilitates anchoring of radial actin fibers to CDH1 junction complexes at the cell membrane . Plays a role in the early stages of desmosome cell-cell junction formation via facilitating the recruitment of DSG2 and DSP to desmosome plaques . Has a potent invasive suppressor role. It is a ligand for integrin alpha-E/beta-7.

DATASHEET

E Cadherin Rabbit Polyclonal Antibody

CAT. NO. APA12390

DATA

Western blot analysis of E Cadherin expression in HeLa (A) whole cell lysates. (Predicted band size: 97 kD; Observed band size: 135 kD)

Immunohistochemical analysis of E Cadherin staining in human lung cancer formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

STORAGE

Store at 4°C short term. For long term storage, store at -20°C, avoiding freeze/thaw cycles.
