BACKGROUND

Plays a role in intracellular protein trafficking and degradation . May regulate CFTR chloride currents and acid-induced ASIC3 currents by modulating cell surface expression of both channels . May also regulate the intracellular trafficking of the ADR1B receptor . May play a role in autophagy . Together with MARCHF2 mediates the ubiquitination and lysosomal degradation of CFTR . Overexpression results in CFTR intracellular retention and lysosomal degradation in the lysosomes .

APPLICATION

To ensure optimal assay performance, AREX recommends conducting reagent titration tailored to each testing system for optimal detection results.
