DATASHEET

N-myc Rabbit Polyclonal Antibody

CAT. NO. APA13796

DATA

Western blot analysis of N-myc expression in mouse brain (A) whole cell lysates. (Predicted band size: 49 kD; Observed band size: 62 kD)

Data 2

Immunohistochemical analysis of N-myc staining in human brain formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

STORAGE

Store at 4°C short term. For long term storage, store at -20°C, avoiding freeze/thaw cycles.
