**BACKGROUND**

E3 ubiquitin-protein ligase that plays a role in the regulation of inflammatory response . Mechanistically, mediates the 'Lys-48'-linked polyubiquitination of TAB2, a regulatory protein of the kinase TAK1, leading to its degradation via the proteasomal pathway and inhibition of the TLR-mediated inflammatory immune response . May act as a transcriptional repressor in mitogen-activated protein kinase signaling pathway.

**APPLICATION**

To ensure optimal assay performance, AREX recommends conducting reagent titration tailored to each testing system for optimal detection results.
